

1. "Chemical dump site" means a place or area where chemicals or other waste materials used in a clandestine drug lab operation have been located.

2. "City" means the City of Lilydale.

3. "Clandestine drag lab operation" means the unlawful manufacture or attempt to manufacture a controlled substance.

4. "Clandestine drug lab site" or "site" means a place or area where law

enforcement personnel have determined that conditions associated with an unlawful clandestine drug lab operation exist. A clandestine drag lab site may include dwellings, accessory buildings, structures or units, a chemical dumpsite, a vehicle, boat, trailer or other appliance.

5. "Controlled substance" means a drug, substance or immediate precursor specified in Minn. Stat. §52.02, Schedules I through V, as maybe amended. The term does not include distilled spirits, wine, malt beverages, intoxicating liquors or tobacco.

6. "Manufacture", in places other than a pharmacy, includes the production, cultivation, quality control or standardization by mechanical, physical, chemical or pharmaceutical means, and the packing, re-packing, tableting, encapsulating, labeling, relabeling or filling of drugs.

2.7 "Owner" means a person, firm, corporation or other entity who or which owns, in whole or in part, the land, building, structure, vehicle, boat, trailer or other location associated with a clandestine drug lab site. Unless information is provided to prove otherwise, the owner of real property is deemed to be the property taxpayer of record in Dakota County files, and the owner of a vehicle, boat or trailer is deemed to be the person listed as the owner on the most recent title to the vehicle, boat or trailer.

3 Declaration of public health nuisance. All dwellings, accessory structures, buildings, vehicles, boats, trailers, personal property, adjacent property or other locations, associated with a clandestine drug lab site are potentially unsafe due to health hazards and are declared to be a public health nuisance.

4 Law enforcement action.

4.1 Law enforcement authorities who identify conditions associated with a clandestine drug lab site that may place the public or occupants at risk for exposure to harmful contaminants and other associated conditions may:

1. Promptly notify the City health authority, county child protection division, the United States drug enforcement administration, and the site owner about the site and the conditions found;

2. Treat, store, transport or dispose of all waste generated from the clandestine drug lab operation and found at the site in a manner consistent with the Minnesota department of health and Minnesota pollution control regulations;

3. Issue a temporary declaration of public health nuisance for the

affected site and post a copy of the declaration on all doorway entrances to the site or, in the case of bare land, in several conspicuous places on the property. This temporary declaration will expire after the City health authority inspects the site and determines the appropriateness of issuing a permanent declaration of public health nuisance;

4. Notify all people occupying the site that a temporary declaration of public health nuisance has been issued;

5. Require all people occupying the site to immediately vacate the site, remove all pets from the site, and not return without written authorization from the City health authority;

6. Notify the occupants vacating the site that the personal property at the site may be contaminated with dangerous chemical residue; and,

7. Put locks on each doorway entrance to the site to prohibit people from entering the site without authorization.

4.2 The notification of the people and organizations mentioned above maybe delayed to accomplish appropriate law enforcement objectives.

805.05 Seizure of Property. When a clandestine drug lab site is inside a vehicle, boat, trailer or other form of moveable personal property, law enforcement authorities must immediately seize it and not allow it to be transported except to a more secure location. All other requirements of this section must be followed as closely as possible given the specific type of property in which the site is discovered.

805.06 Action by City Health Authority.

1. **Inspection and declaration of nuisance.** Within forty-eight (48) hours of notification that law enforcement authorities have determined the existence of a clandestine drug lab site, the City health authority must inspect the site. The City health authority may then promptly issue a permanent declaration of public health nuisance and a Do Not Enter- Unsafe to Occupy Order for the affected site to replace the temporary

declaration. A copy of the permanent declaration and order must be posted on all doorway entrances to the site or, in the case of bare land, in several conspicuous places on the property.

2. **Abatement order.** After issuing the permanent declaration, the City health authority must send written notice to the site owner ordering abatement of the public health nuisance. The abatement order must include the following:

1. A copy of the declaration of public health nuisance and Do Not Enter-Unsafe to Occupy Order;
2. Information about the potentially hazardous condition of the site;
3. A summary of the site owner's and occupant's responsibilities under this section; and,
4. Information that may help the owner locate appropriate services necessary to abate the public health nuisance.

6.3 Notice to other parties. The health authority must also mail a copy of the permanent declaration of public health nuisance and a copy of this section to the following parties at their last known addresses:

1. Occupants or residents of the site if known;
2. Neighbors in proximity to the site who may be reasonably affected by the conditions found;
3. The appropriate enforcement division of the United States drug enforcement administration; and,
4. Other city, state and local authorities, such as the city public works department, the state pollution control agency, the state department of health, and the department of natural

resources, that are known to have public and protection

responsibilities applicable to the situation.

6.4 Modification or removal of declaration. The City health authority may modify or remove the declaration of public health nuisance after the health authority receives documentation from a City-approved environmental hazard testing and cleaning firm stating that the suspected health and safety risks, including those to neighbors and potential occupants, either do not exist or have been sufficiently abated or corrected to justify amendment or removal of the declaration.

805.07 Site Owner's Responsibility to Act.

7.1 Within ten (10) business days after the abatement order is mailed to the site owner, the owner must accomplish the following:

7.1.1 Provide the City health authority, in writing, with:

1. Confirmation that all persons and their pets have vacated the site;

2. The names of all children who the owner believes were residing at the site during the time period the clandestine drug lab is suspected to have been at the site; and,

3. Confirmation that the site will remain vacated and secured until the public health nuisance is completely abated as required by this section.

7.1.2 Contract with one or more City-approved environmental hazard testing and cleaning firms to conduct the following work in accordance with the most current state guidelines:

1. A detailed on-site assessment of contamination at the site, including the personal property in the site;

2. Soil testing of the site and testing of all property and soil in proximity to the site which the environmental hazard testing and cleaning firm determines may have been affected by the conditions found at the

site;

3. A complete clean-up of the site (including the clean-up or removal of plumbing, ventilation systems, fixtures and contaminated soil) or a demolition of the

structures on the site and a complete clean-up of the demolished site;

4. A complete clean-up, or disposal at an approved dump site, of all personal property in the site that is found to have been affected by the conditions at the site;

5. A complete clean-up of all property and soil in proximity to the site that is found to have been affected by the conditions at the site; and,

6. Remediation testing and follow-up testing, including testing of the ventilation system and plumbing, to determine that all health risks are sufficiently reduced to allow safe human occupancy and use of the site, the personal property in it, and all property and soil in proximity to the site.

3. Provide the City health authority with the identity of the testing and cleaning firm with which the owner has contracted for abatement of the public health nuisance as required above; and,

4. Sign an agreement with the City health authority establishing a clean-up schedule. The schedule must establish reasonable deadlines for

completing all actions required by this section for abatement of the public health nuisance. The City health authority must consider practical limitations and the availability of contractors in approving the clean-up schedule.

7.2 The owner must meet all deadlines established in the clean-up schedule. The owner must provide the City health authority written documentation of the clean-up, including a signed statement from a City-approved environmental hazard testing and cleaning firm that the site, all personal property in it, and all property and soil in proximity to the site is safe for human occupancy and use and that the clean-up was conducted in accordance with the most current state guidelines.

805.08 Site Owner's Responsibility for Costs. The site owner is responsible for all costs of dealing with and abating the public health nuisance, including contractor's fees and the City's costs for services performed in connection with the clandestine drug lab site clean up. The City's costs may include:

1. Posting of the site;
2. Notification of affected parties;

3. Securing the site, providing limited access to the site, and prosecution of unauthorized persons found at the site;
4. Expenses related to the recovery of costs, including the special assessment process;
5. Laboratory fees;
6. Clean-up services;
7. Administrative fees;
8. Legal fees; and,
9. Other associated costs.

805.09 City Action and Recovery of Costs.

1. If the site owner fails to comply with any of the requirements of this section, the City health authority is authorized to take all reasonable actions necessary to abate the public health nuisance including contracting with a City-approved environmental hazard testing and cleaning firm to conduct the work outlined in Section 7.1.2. The City health authority is also authorized to provide a copy of the declaration of public health nuisance to the holders of mortgage or lien interests in the affected site.

2. If the costs to clean the site or to clean the personal property at the site are prohibitively high in relation to the value of the site or the personal property, the City is authorized to remove or demolish the site, structure or building and dispose of the personal property in it. These actions must be taken in accordance with the provisions of Minn. Stat. Chap. 463.

3. If the City abates the public health nuisance, the City is entitled to recover all of its actual costs plus an additional twenty-five percent (25%) of such costs for administrative and legal expense, in addition to any other legal remedy. The City may recover costs by civil action against the site owner or by assessing the costs against the site as a special assessment under City Code Section 801.05.

10 Recovery of Costs From Persons Causing Damage. Nothing in this section limits the rights of the site owner, occupants, neighbors, or the City to recover

costs from the persons contributing to the public health nuisance, such as the operators of the clandestine drug lab, or from other lawful sources.

1. **Unauthorized Removal of Postings.** It is unlawful for a person, except authorized City personnel, to remove a temporary or permanent declaration of public health nuisance or Do Not Enter Unsafe to Occupy Order from a clandestine drug lab site.

2. **Entry Into or Onto Site.** While a declaration of public health nuisance for a site is in effect and has been posted at the site, no person, other than a law enforcement officer, the City Health authority, or a person authorized by the City health authority, is permitted to be inside or on a site.

3. **Removal of Personal Property From the Site.** While a declaration of public health

nuisance for a site is in effect and has been posted at the site, no personal property may be removed from the site without prior written consent from the City health authority. Consent to remove personal property may be granted at the reasonable discretion of the City health authority, and only in cases of hardship after:

4.

A City-approved environmental hazard testing and cleaning firm has advised the City, in writing, that the item(s) of personal property can be sufficiently cleaned to remove all harmful contamination; and, 1 The owner of the personal property agrees in writing that the owner:

1 Is aware of the danger of using the contaminated property;

2 Will thoroughly clean the property to remove all contamination before the property is used; and,

3 Releases and agrees to indemnify the City from all liability to the owner and third parties for injuries or damages alleged to have been caused by the contaminated property.

805.14 Each violation of this Ordinance is a misdemeanor punishable by a fine of up to

\$1,000.00 and incarceration of up to ninety (90) days.
